

The New HASA Liquid Feeder™

For the Most Beautiful Blue Pool Year Round

The HASA Liquid Feeder™ is a proactive way to daily dose your pool with liquid chlorine sanitizer. It's automatic, better for the environment, and the most effective method for ensuring **Safe, Clean and Clear** crystal blue pool water.

Get the Backyard Oasis You Deserve!

- Easy-to-fill, large capacity unit allows for longer time intervals between fills
- Holds enough supply of sanitizer to automatically service your pool for up to 2 weeks
- UV protected tank
- Fittings and tubes are enclosed for enhanced protection
- Child-resistant entry
- Eliminates the need for floating dispensers that can damage pool covers and attract children or pets
- Feeds sodium hypochlorite liquid sanitizer—the safest and most efficient way to ensure you always have a more brilliant sparkling pool

Safest pool maintenance option & embraced by pool service professionals!

Use with HASA Sani-Clor®

The feeder is designed for use with HASA Sani-Clor® sodium hypochlorite. Liquid sanitizer is preferred by pool maintenance professionals and pool owners, and is the choice of high-end resorts like the Bellagio Hotel in Las Vegas.

Benefit: The HASA Liquid Feeder™ does not add unnecessary additional amounts of cyanuric acid (CYA) that can cause your chlorine level to have to work harder when levels exceed the recommended range.

Streamlined & stylish design complements your existing pool care equipment!

Safety First

The HASA Liquid Feeder™ uses a simple technology that is better for our planet. The system uses no additional electricity and reduces the need for frequent pool drainings.

The result: A clean, clear pool for your family to enjoy without unnecessary additives.
