

HASA GYSAR 'F'

THE THICK ONE – TILE BRITE TILE CLEANER

HASA GYSAR 'F' was developed especially for the pool service professional. The thick, opaque gel – like tile cleaner means one application of **GYSAR 'F'** to your brush is all you will normally need to completely clean an average residential pool's tile. **GYSAR 'F'** is an excellent tile cleaner by itself but it can be mixed with muriatic acid to become a very effective way of removing oils and scale build up.

DIRECTIONS FOR USE:

GYSAR 'F' TILE BRITE CLEANER is a superior routine tile cleaning agent. It can be mixed with muriatic acid at an approximate proportion of $\frac{1}{4}$ muriatic acid to $\frac{3}{4}$ **GYSAR 'F'**, for even greater cleaning ability. Recommended mixing container is a small bucket which will accommodate tile brush or applicator when acid is added to mixture. **GYSAR 'F'** adheres well to fiber or plastic tile brushes, sponges, or plastic scrubbing pads.

DO NOT ATTEMPT TO MIX GYSAR 'F' AND ACID IN THE GALLON BOTTLE AS IT WILL BECOME TOO THICK TO POUR.

AVAILABLE PACKAGING:

GYSAR 'F' is sold in an economical one gallon container for pool service professional.
