

HI-TEMP SPA-GARD

CHLORINE SANITIZER FOR SPAS AND HOT TUBS

HASA HI-TEMP SPA SPA-GARD sanitizes and oxidizes the spa water. **HASA HI-TEMP SPA SPA-GARD** brings new sparkle to dull water caused by the buildup of organic waste while it also kills harmful bacteria in the spa water. **HASA HI-TEMP SPA SPA-GARD** has an almost neutral pH, making it the perfect choice for normal sanitizing and shocking of your spa water.

DIRECTIONS FOR USE:

Maintenance:

Add 1 teaspoon daily or as needed. Use a test kit and adjust dosage if necessary.

Shocking:

After heavy use, rain storms, dust storms, contamination, and at least every 7-10 days superchlorinate or shock the spa. Shocking is the addition of several times the normal amount of chlorinating chemical to destroy combined chlorine residuals, perspiration, and other chemicals which may build up in the spa water.

DO NOT USE SPA AGAIN UNTIL CHLORINE RESIDUAL IS BETWEEN 3.0-5.0 PPM.

One ounce will provide 2.0 ppm available chlorine per 400 gallons of water, one equals 5 teaspoons.

Proper spa maintenance includes changing spa water. For an estimate of proper water life follow the formula below:

Divide the gallons in your spa by 3 times the average number of bathers per day.

Example: 375 gallon spa – 1 person x 3 = 3
 $375/3=125$ (change water every 125 days)

AVAILABLE PACKAGING:

HASA HI-TEMP SPA SPA-GARD is available in 2# containers.
