

HI-TEMP SPA OXIDIZER

NON-CHLORINE SHOCK FOR SPAS AND HOT TUBS

HASA HI-TEMP SPA OXIDIZER brings sparkle to dull water caused by the buildup of organic waste in the spa water. This organic waste combines with your sanitizer in the spa water to form combined chlorine (chloramines) or combined bromine (bromamines) which can be very irritating. Shocking the spa water will 'burn off' (oxidize) the organic waste and nitrogen compounds to allow your sanitizer to be very effective once again.

DIRECTIONS FOR USE:

For Initial Treatment:

Add 6 ounces of **HI-TEMP SPA OXIDIZER** per 400 gallons of spa water.

For Maintenance:

Add 3 ounces daily for normal spa use. Dosage may be increased during prolonged period of high temperatures, or heavy usage. Apply **HASA HI-TEMP SPA OXIDIZER** by broadcasting entire dosage over the water surface, and allowing 30 minutes to dissolve.

Spa may be used immediately after application.

This product does not replace chlorine or any other sanitizer. It is not a disinfectant and will not kill bacteria in the spa water.

Proper spa maintenance includes changing spa water. For an estimate of proper water life follow the formula below:

Divide the gallons in your spa by 3 times the average number of bathers per day.

Example: 375 gallon spa – 1 person x 3 = 3
 $375/3=125$ (change water every 125 days)

AVAILABLE PACKAGING:

HASA HI-TEMP SPA OXIDIZER is available in 3# containers.
